

## **Requirements for credit and examination**

### **Requirements for awarding credits and examination admittance**

**For Surgical propedeutics and Surgery courses, according to the study regulations, participation in all activities listed in the study plan is mandatory.**

**Considering relevance of the subject, no more than one absence in practica and two absences in lectures are accepted for completion of the semestral course. Naturally, these need to be reasonable and properly excused in the study department.**

**Capacity of surgical departments disallows either replace nor additional practica past the semestral study plans.**

**Surgical examination (also a part of the state final examination) during practicum requires students' basic skills in Slovak language for communication with patient and medical staff in the hospital ward. If basic language conditions are not met, it is not possible to complete practical education.**
