Charakteristika výstupu, ktorý nie je registrovaný v CREPČ alebo CREUČ / Characteristics of the output that is not registered in CRPA or CRAA	OCA10. Hyperlink na záznam v inom verejne prístupnom registri, katalógu výstupov tvorivých činností / Hyperlink to the record in another publicly accessible register, catalogue of research/ artistic/other outputs ⁷	
	OCA11. Charakteristika výstupu vo formáte bibliografického záznamu CREPČ alebo CREUČ, ak výstup nie je vo verejne prístupnom registri alebo katalógu výstupov / Characteristics of the output in the format of the CRPA or the CRAA bibliographic record, if the output is not available in a publicly accessible register or catalogue of outputs	
	OCA12. Typ výstupu (ak nie je výstup registrovaný v CREPČ alebo CREUČ) / Type of the output (if the output is not registered in CRPA or CRAA) <i>Výber zo 67 možností (pozri Vysvetlivky k položke OCA12) / Choice from 67 options (see Explanations for OCA12).</i>	
	OCA13. Hyperlink na stránku, na ktorej je výstup sprístupnený (úplný text, iná dokumentácia a podobne) / Hyperlink to the webpage where the output is available (full text, other documentation, etc.)	
	OCA14. Charakteristika autorského vkladu / Characteristics of the author's contribution	

	<p>OCA15. Anotácia výstupu s kontextovými informáciami týkajúcimi sa opisu tvorivého procesu a obsahu tvorivej činnosti a pod. / Annotation of the output with contextual information concerning the description of creative process and the content of the research/artistic/other activity, etc. ⁸Rozsah do 200 slov v slovenskom jazyku / Range up to 200 words in Slovak/Rozsah do 200 slov v anglickom jazyku / Range up to 200 words in English</p>	
	<p>OCA16. Anotácia výstupu v anglickom jazyku / Annotation of the output in English ⁹ Rozsah do 200 slov / Range up to 200 words</p>	<p>Creative process: creating a research concept and research plan, obtaining, sorting and evaluating data, comparing subjective and objective findings, formulating recommendations for practice.</p> <p>The number of Parkinson's disease patients is instantly growing in Slovakia. As it is progressing disease which extends to the area of human needs it increases the demands on nursing care with the aim to ensure the quality of life of patients who suffer the Parkinson's disease. In the diploma thesis a standard questionnaire Jenkinson Parkinson disease questionnaire PDQ-39 was used. Researched sample consists of 120 patients suffering the Parkinson's disease. For statistical evaluation mathematical methods and excel were used. In this research we analysed and interpreted results of PDQ-39 questionnaire for individual physical, psychical and social domains. Monitoring quality of life assessment was carried out by using sub-topics such as Mobility, Daily Activities, Disease Symptoms, Emotions, Social Support, Cognitive Functions, Communication and Physical Discomfort. Significant differences were found in the circumstances that identify Physical Needs. Overall, we note the difficulties for 53.17% of respondents with Mobility, especially with Mobility Over Longer Distances and When In Public. We also have found significant differences in the psychological needs, especially in the categories of Disease Symptoms, Emotions, Cognitive Functions and Communication as they effect quality of life in managing daily activities. When analysing the area of social support, communication and physical discomfort we can assume that the disease has only seldom negative impact on quality of life. In the psychical area we can confirm that symptoms of depression and anxiety cause restrictions in everyday activities. Knowing the problems of patients with Parkinson's Disease affects the identification of nursing interventions in meeting the biological, psychological and social needs and improving the quality of life.</p>

<p>OCA18. Charakteristika dopadu výstupu na spoločensko-hospodársku prax / Characteristics of the output's impact on socio-economic practice <i>Rozsah do 200 slov v slovenskom jazyku / Range up to 200 words in Slovak</i> <i>Rozsah do 200 slov v anglickom jazyku / Range up to 200 words in English</i></p>	<p>Parkinsonova choroba výrazne ovplyvňuje nielen kvalitu života samotného pacienta, ale aj členov jeho rodiny, vzťahy v práci a spoločenskom živote a tiež mieru práceneschopnosti. Kvalitná zdravotná starostlivosť, vrátane ošetrovateľskej, spomaľuje progres choroby a následne dlhšie zotrvanie v spoločenskom a pracovnom procese. Parkinson's disease significantly affects not only the quality of life of the patient himself, but also his family members, relationships at work and social life, and also the degree of incapacity for work. Quality health care, including nursing care, slows down the progression of the disease and, consequently, a longer stay in the social and work process.</p>
