V. Informácie o vedecko-výskumnej a publikačnej činnosti

Vedecko-výskumná činnosť bola v roku 2020 v súlade s napĺňaním strategických cieľov Dlhodobého zámeru vedecko- výskumnej činnosti na obdobie rokov 2015 – 2020, ktorého prioritou je skvalitnenie a ďalší rozvoj vedecko-výskumnej činnosti, ako jedného z najdôležitejších faktorov pre zaradenie LF SZU medzi univerzity a vysoké školy orientované na zdravie, medicínu a zdravotníctvo nielen v rámci SR ale aj v stredoeurópskom priestore.

Publikačná činnosť

Hlavným výstupom vedeckovýskumnej činnosti LF je publikačná činnosť. V prvej z nich je uvedené štatistické vyhodnotenie publikácií podľa predpísaných kritérií, v ďalšej sú všetky práce s kompletnou citáciou (autori, názov článku, časopis, rok vydania, ročník, čísla strán) v najsledovanejších kategóriách (monografie, kapitoly v monografiách, učebnice a články uverejnené v karentovaných časopisoch (ostatné kategórie dostupné v knižnici SZU).

VI. Habilitačné konania a konania na vymenúvania profesorov

Lekárska fakulta má rozhodnutím ministra školstva SR priznané právo od 21. 06. 2016 uskutočňovať habilitačné konanie a konanie na vymenúvanie profesorov bez časového obmedzenia v študijných odboroch: 7.1.4.vnútorne choroby a 7.1.7. chirurgia. Habilitačné konanie a konanie na vymenúvanie profesorov sa na LF SZU uskutočňuje v zmysle Vyhlášky č. 457/2012 Ministerstva školstva, vedy, výskumu a športu SR, ktorou sa mení a dopĺňa vyhláška Ministerstva školstva Slovenskej republiky č. 6/2005 Z. z. o postupe získavania vedecko-pedagogických titulov alebo umelecko-pedagogických titulov docent a profesor a v zmysle Kritérií na habilitačné konanie a konanie na vymenúvanie profesorov na získanie vedecko-pedagogického titulu „docent“ a „profesor“ na Lekárskej fakulte SZU, ktoré boli schválené dňa 19. 5. 2014 VR LF SZU a následne 15. 12. 2014 VR SZU.

Habilitačné konanie

V roku 2020 na Lekárskej fakulte SZU nebol predložený žiadny návrh na vymenovanie za docenta.

Vymenúvacie konanie

V roku 2020 boli na Lekárskej fakulte SZU v odbore chirurgia predložené dva návrhy a v odbore vnútorne choroby jeden návrh na vymenovanie za profesora.

VII. Akademická mobilita zamestnancov

V rámci programu **Erasmus+** v kalendárnom roku 2020 neboli vyslaní do zahraničia žiadni zamestnanci SZU. Z dôvodu prebiehajúcej pandémie COVID-19

bolo zrušených 8 plánovaných mobilít zamestnancov SZU. Rovnako sme v období kalendárneho roku 2020 neprívatili žiadnych hostujúcich zamestnancov partnerských inštitúcií na mobilitný pobyt na našej univerzite.

V roku 2020 SZU úspešne získala spoločne s partnermi v konzorciu **Erasmus+** projekt strategického partnerstva **AKUCOM** - Komplexný multiprofesionálny prístup k liečbe pacientov so zameraním na použitie menej frekventovaných metód. Projekt AKUCOM sa zameriava na komplexný multiprofesionálny prístup k liečbe pacientov so zameraním na použitie menej frekventovaných metód, v prípade SZU projekt zastrešuje Katedra fyziatrie, balneológie a liečebnej rehabilitácie Lekárskej fakulty. Ďalšími partnermi projektu sú Prvá klinika akupunktúry a naturálnej medicíny G. Solára, Slovensko; Sonic Age, Spojené kráľovstvo a Dynamické obchodní služby ČR.

IX. Národné referenčné centrá- NRC

Činnosť NRC slúži včasnej, špecializovanej nadstavbovej a konečnej laboratórnej diagnostike, overovaniu laboratórnych výsledkov, monitorovaniu situácie (epidemiológie) a prevencii závažných poškodení zdravia vplyvom biologických, chemických aj fyzikálnych faktorov vonkajšieho prostredia. V období, keď Slovensko vstupom do EÚ prijalo záväzky aj v oblasti monitorovania výskytu a prevencie vzniku prenosných a civilizačných chorôb, majú NRC nezastupiteľnú úlohu. Zriadenie NRC bolo vyvolané aj tlakom zdravotníckej praxe. Rýchly nárast poznatkov a vývoj špičkových metód nemôže v plnom rozsahu realizovať široká zdravotnícka prax, ale je nevyhnutné, aby aspoň najdôležitejšie problematiky boli celoštátne zabezpečené na najvyššej úrovni. NRC zohrávajú dôležitú úlohu nielen v rámci Slovenskej republiky, ale časť z nich je napojená na európsku sieť a ich činnosť je koordinovaná Európskou komisiou a Svetovou zdravotníckou organizáciou. Činnosť NRC v súčasnosti zriadených na pôde SZU zabezpečujú oddelenia LF SZU, ktoré disponujú po desaťročia budovaným odborným a vedomostným potenciálom a do značnej miery aj priestorovým a prístrojovým

Lekárska fakulta SZU zabezpečovala aj činnosť nasledujúcich národných referenčných centier:

1. NRC pre dioxíny a príbuzné zlúčeniny
2. NRC pre prionové choroby a pomalé vírusové neuroinfekcie
3. NRC pre identifikáciu enterálnych vírusov
4. NRC pre vírusové hepatitídy
5. NRC Zbierka kultúr patogénnych mikroorganizmov
6. NRC pre prevenciu HIV/AIDS

X. Rozvoj LF SZU

- Rozvíjať štúdium všeobecného lekárstva, vychovávať lekárov pre celý systém zdravotnej starostlivosti,
- rozvíjať štúdium zubného lekárstva v slovenskom jazyku,
- rozvíjať štúdium všeobecného lekárstva v anglickom jazyku – General Medicine,
- získať akreditáciu na uskutočňovanie doktorandského štúdia v ďalších vybraných odboroch,
- rozvíjať špecializačné, certifikačné a kontinuálne vzdelávanie v zmysle zodpovedajúcich nariadení vlády a v zhode s požiadavkami Európskej únie a jej orgánov,
- prehľbovať možnosti širšej medzinárodnej spolupráce v štúdiu aj výmenných vzdelávacích pobytoch študentov denného štúdia,
- zlepšiť motiváciu záujemcov o účasť na školiacich akciách fakulty,
- aktívnejšie sa zúčastňovať na tvorbe a pripomienkovaní legislatívnych noriem v oblasti ďalšieho vzdelávania pracovníkov v zdravotníctve,
- venovať kontinuálnu pozornosť hodnoteniu kvality pedagogického procesu,
- v postgraduálnom vzdelávaní pripravovať odborníkov pre prax v kategóriách lekár, stomatológ, farmaceut a iných zdravotníckych pracovníkov s vysokoškolským vzdelaním,

- prostredníctvom vzdelávania zavádzať do praxe nové preventívne, diagnostické a liečebné metódy a tak zvyšovať úroveň zdravotnej starostlivosti,
- vychovávať mladú generáciu pedagógov LF SZU,
- vychovávať mladých vedeckých pracovníkov,
- zapájať do projektovej činnosti pedagogických a vedeckých pracovníkov LF SZU.

XI. Systém kvality

Lekárska fakulta venovala veľkú pozornosť aj zvýšeniu kvality výučby. Kvalita výučby sa hodnotí priebežne na kolégiách dekana, senátoch a vedeckých radách fakúlt. Pri hospitačnej činnosti sa študijní prodekan zameriaval aj sprístupňovaní problematiky na primeranej úrovni. Kontrolovali, či pedagógovia oboznamovali študentov s podmienkami hodnotenia predmetu na začiatku semestra, ako aj so sylabom predmetu, čo v hodnotení pedagogického procesu študentmi nepatrilo na žiadnej fakulte k silným stránkam.

Pre uchádzačov o štúdium na Lekárskej fakulte univerzita už deviaty rok ponúka uchádzačom o vysokoškolské štúdium možnosť prípravy na prijímacie skúšky. PO organizuje v mesiacoch február až marec prípravné kurzy z biológie a chémie.
